Prevent • Treat • Recover

Guest Speaker Expectations and Requests

Welcome to the Phoenix Center,

We are grateful for your willingness to come and share your journey of recovery with our current clients. We know that for many of you, giving of your time is a sacrifice and one that you are willing to make because of the importance of helping others. Thank you!

There are a few things that the Phoenix Center would like any guest speakers or visitors to follow-

- All visitors who enter the building must be accountable to you and your group. If you do not know the person or would be unwilling to “vouch” for them, please do not allow them to come inside with you. If possible, it would be best if they are a member or regular attender of your Homegroup or recovery group.
- Guest speakers should have approximately 90 days of consecutive recovery before visiting.
- Please use “I statements” when discussing your recovery journey and what has been best for you.
- We have people engaging with us from all over, and the spiritual aspect of each person can vary greatly. Please be open to understanding others and how they may view their Higher Power.
- There are many pathways to recovery and some pathways include MAT and mental health medications. Please reserve one’s personal views on either. If a client asks about medications, please refer them to our medical doctor or their Phoenix Center counselor.
- TIC- Trauma Informed Care is utilized here for our clients and our staff. Please attempt to follow the core values of TIC- Safety, Trustworthiness, Choice, Collaboration, and Empowerment. See our TIC handout for more information.
- Again, thank you for your commitment to others and desire to be of service in the realm of recovery. You are helping us to Serve and Love Every Day.
